

are being delivered and to correct the lack of antecedent problem for the word "surface". The claim dependancy error on claim 2 has been corrected above as has the same problem which it was discovered occurred with claim 3. Claim 14 has also been amended to correct the error noted by the Examiner.

Concerning the double patenting rejection and the requirement for a terminal disclaimer to overcome such rejection, it is noted that this application is a continuation-in-part of U.S. Patent 5,527,350 and that it is anticipated the patent issuing on this application will expire before the expiration of the 5,527,350 patent. However, since the Examiner has indicated that a terminal disclaimer is required notwithstanding these facts, a terminal disclaimer is attached to this amendment.

Since except for the 35 U.S.C. §112 and double patenting issues discussed above, the Examiner has not raised any objections to this application, this application should now be in condition for allowance and favorable action thereon is respectfully requested.

Respectfully submitted,

Ronald J. Kransdorf
